

Products / Services	Description	Service Provider	Service Provider Link
Ventilation (Destratification Fans)	Fans that circulate warm air trapped near ceilings to reduce heating energy use.	Big Ass Fans	https://www.bigassfans.com
Heating System Upgrade (Heat Pumps)	Replacement of traditional boilers with energy-efficient air-source or ground-source heat pumps.	Mitsubishi Electric	https://les.mitsubishielectric.co.uk
LED Lighting Upgrade	Replacement of traditional lighting with energy-efficient LED lighting systems.	Philips Lighting	https://www.signify.com
Lighting Controls & Sensors	Motion sensors and smart lighting controls that reduce lighting usage when spaces are empty.	Schneider Electric	https://www.se.com
Solar PV Systems	Installation of solar panels to generate renewable electricity on-site.	SolarEdge	https://www.solaredge.com
Battery Storage	Systems that store excess renewable energy for later use.	Tesla Energy	https://www.tesla.com/energy
Refrigeration Efficiency Upgrade	High-efficiency refrigeration units with improved temperature control.	Carrier Refrigeration	https://www.carrier.com
Air Compressor Optimisation	Energy-efficient compressors and leak detection systems to reduce compressed air energy loss.	Atlas Copco	https://www.atlascopco.com
Building Insulation	Upgrading roof and wall insulation to reduce heat loss.	Kingspan Insulation	https://www.kingspan.com
Rainwater Harvesting	Systems that collect and reuse rainwater for non-potable uses.	Graf UK	https://www.graf-water.co.uk
Waste Compactors & Balers	Equipment that compresses waste and recyclable materials to reduce waste handling costs.	Mil-tek	https://www.miltek.co.uk
Energy Submetering	Monitoring devices that track energy usage by system or area.	Siemens	https://www.siemens.com
